## Investment Comments

The Optimize Portugal Golden Opportunities fund recorded a gain of 1.3% over the last month, ending the year with a performance of 25.1%. By comparison, the PSI 20 Total Return index closed the same period up 2.1%, finishing the year with a gain of 35.5%.

On the positive side, Semapa (+24%) stood out, reflecting the crystallisation of value in its cement subsidiary, Secil, which was sold at a price significantly above all market valuations. BCP (+9.1%) once again delivered an outstanding performance, mirroring the strong performance of its Iberian peers. NOS (+9%) also performed well, benefiting from the macroeconomic outlook for the Portuguese economy and from the announcement of price increases, which signalled that the impact of the new entrant DIGI was not as disruptive as had been anticipated last year. On the negative side, Galp (-15.8%) underperformed as the terms of the agreement for the farm-down in Namibia disappointed investors, not only in terms of valuation but, above all, due to its structure. The market had expected greater simplification of the project with the entry of a new partner, allowing for the crystallisation of part of its value; instead, the opposite occurred. The agreement with TotalEnergies was structured as an asset swap, introducing additional complexity to the project off the Namibian coast. In addition, the consortium's estimate for first production was revised, implying a delay of two years.

## Objective and Investment Policy

The main objective of the Fund, as a UCITS multi-asset fund, is to provide participants with long-term investment growth through a balanced investment in different classes of liquid assets with a predominant focus on Portugal, investing at least 60% of its assets in shares of companies headquartered in Portugal and at least 80% of its assets in shares or debt securities of companies headquartered in Portugal or listed on Euronext Lisbon or public debt securities issued by the Portuguese State or other public entities. Investment Limits: the fund will invest between 60% and 100% of the NAV in equities or equivalent, between 0% and 10% in collective investment schemes and between 0% and 40% in sovereign or private debt securities.

## Investor Profile

The fund is intended for investors who have a long term perspective for the allocation of their capital. This Fund may not be suitable for investors that wish to redeem their investment before 5 years.

## Risks associated with the Investment

- Liquidity Risk: the Fund invests in securities which may be subject to a devaluation, should they be sold during periods of reduced liquidity.
- Operational Risks: the Fund depends on other entities, the non-compliance of which may impact the Fund's value.
- Credit Risk: Should there be a significant investment in debt equities, an issuer may fail to meet his principal and interest timely payment obligations.
- Investment Concentration Risk – By concentrating investments in a limited number of assets, the Fund may assume some investment concentration risk.
- Risk of Conflicts of Interest: the Fund may invest, even partially, in funds managed by Optimize, without subscription or redemption charges.
- Capital Risk – There is no guarantee for the participant as to the preservation of the capital invested or in relation to the return on its investment, so there is a risk of loss of the capital invested.
- Sustainability risk: The Fund may be exposed to sustainability risks, these being defined as an event or condition of an environmental, social or governance nature, the occurrence of which is likely to cause an actual or potential negative impact on the value of the investment.
- Market risk: the assets in which the fund invests, by their nature, show significant price fluctuations, so the Fund presents a high risk.
- The Fund may use derivatives, with a potential impact on the unit's value.

The historic performance data represents past data and do not guarantee future returns. The value of the participation units can increase or decrease depending on the risk level that varies between 1 (minimum risk) and 7 (maximum risk). The fund Optimize Portugal Golden Opportunities is a UCITS fund and its Prospectus and KIID are available on the commercializing entities. The returns mentioned are net of management and deposit fees, audit costs and supervisory fee. The figures disclosed imply the taxation borne by the collective investment undertaking and the eventual payment of capital gains tax are investors responsibility. Investing in the collective investment undertaking may result in the loss of invested capital. The disclosed annualized performance measures, calculated based on a period exceeding one year, would only be obtained if the investment was made during the entire reference period. The Synthetic Risk and Remuneration Indicator measures the risk of the change in the price of the participation unit of the fund based on the volatility of the last five years. A lower risk potentially implies a lower return, and a higher risk potentially implies a higher return.

This information regarding the funds managed by Optimize Investment Partners SGOIC does not waive the reading of the Prospectus and Key Investor Information Document (KIID). The taxation applied to the investment funds may have an impact on the personal fiscal status of the investor.
